MLC-3201 MK2

PC Monitor

 Read this booklet thoroughly before using and save it for future reference

Section 1: Product Overview

1.1 - Monitor Buttons

- 1 Power Connector:** Insert the power cable to supply power to the monitor.
- 2 M Menu Button:** Press to display the OSD menu or enter sub-menus.
- 3 ▼ Down Button:** Press to move down in the menus.
- 4 ▲ Up Button:** Press to move up in the menus.
- 5 E Exit Button:** Press to exit.
- 6 ⏻ Power Button:** Press to turn the monitor on/off.
- 7 LED Indicator:** Changes colors to indicate status. Refer to Section 6.

 The E button can also be used to switch between two color gamuts when a compatible graphics card and either HDMI or DP connections are in use.

1.2 - Monitor Ports

- 8 Audio Connector:** Insert one end of the Audio cable into the computer's Audio output and connect the other end to the monitor's Audio port.
- 9 VGA Connector:** Insert one end of the VGA cable into the computer's VGA output and connect the other end to the monitor's VGA port.
- 10 HDMI Connector:** Insert one end of the HDMI cable into the computer's HDMI output and connect the other end to the monitor's HDMI port.

Section 2: Stand Installation

-  Keep the foam over the monitor before attaching the stand. Follow the steps below to finish the installation.

1. Open the package, take out the product with foam still attached, and gently place it on a desktop or table.

2. Take out the two parts of the stand, remove the foam covering the back of the monitor, and press the button to remove the stand plate.

3. Use the screwdriver and two 12mm NO.1 screws to fasten the stand plate to the stem. Next, use the remaining 14mm stand screws to fasten the base to the stem.

4. Insert the stand's plate into the opening on the back of the monitor. It should click into place. Make sure the stand is securely attached to the back of the monitor then remove the monitor from the remaining foam section and stand it up on a table or desk as desired.

-  If needed, the stand can easily be detached from the monitor by pressing the button near the stand plate. Make sure the monitor is laid on a flat surface before removing the stem.

Section 3: Mount Installation

 This monitor **ONLY** includes screws which may be used when attaching the monitor to a VESA 75x75mm type mount. No VESA mount or mounting accessory is included.

1. Open the package, take out the product with foam still attached, and gently place it on a desktop or table. If the monitor is attached to the stand, remove the stand.

2. Take out the two parts of the stand, remove the foam covering the back of the monitor, and press the button to remove the stand plate.

3. Remove the original screws x 4 (1) from the opening in the back of the monitor, then use the NO. 2 screws provided to secure the rear panel.
4. Follow the directions received with your VESA mount stand or accessory and install the monitor on the wall or fixture as desired. Remember to use the included NO. 2 screws when attaching anything to the back of the monitor. Refer to the image (2) for correct screw placement when attaching the monitor to a mount.

-  - Use only the NO. 2 Screws (30 mm x 2 pcs, 26mm x 2 pcs) provided with this type of installation.
- Do not discard the original screws as these may be needed for future use.

Section 4: Connectivity Options

4.1 – Removing the Port Cover

Before connecting any cables, remove the port cover first.

4.2 – Connecting the Power Cable

Connect the included power cable to the power connector, and then plug the other end into an wall outlet.

4.3 – HDMI Connectivity

In order for the monitor to receive HDMI signals from the computer, use the HDMI cable to connect the monitor to the computer.

Section 5: Basic Operation

1. Insert one end of the HDMI cable into your PC's graphics card.

 For optimal refresh rate (or "performance"), it is recommended to use a HDMI cable with the monitor's corresponding connector.

2. Connect the other end of the cable to the corresponding connector on your monitor. See the image below.

3. Connect the power cable to your monitor then connect the other end to your power source. It is recommended that you use a surge protector with adequate voltage if a wall outlet cannot be reached directly.

4. Locate the power button on the monitor and press it to turn the monitor on.

 If you cannot locate the power button, please refer to Section 1.1.

Section 6: Indicator Light

This light is located on the bottom of the monitor.

Bottom View

Solid blue light indicates power is on and the monitor is operating normally. Flashing blue light indicates no video source has been detected. Red light indicates that no horizontal or vertical signal has been detected or voltage is low. Please ensure your computer is on and all video cables are fully inserted and/or connected.

Section 7: ECO Modes and Gameplus Switching

1. Press any one of the buttons (M, ▼, ▲, E, ⏻) to activate the navigation window.

2. Press ▼ button to switch Gameplus modes. According to the needs of your game, choose the corresponding game icon. These game icons are primarily designed to optimize your aim during shooting games, though they can be used for other scenarios.

3. Press ▲ button to switch ECO modes. These modes include Standard, Text, Movie, Game, FPS and RTS modes and can be used to optimize settings according to your activity. Standard mode is suitable for most activities.
