

VB602 Video Baby Monitor User Manual

PRODUCT FEATURES

Thank you for choosing this baby monitor.

The sober design of our product easily integrates with all interiors and allows you to keep a watchful eye on your babies.

Communication between transmitter and receiver is through radio waves at a max distance of 260 m (distance in open field). The digital connection provides transmission without interference. The camera is equipped with infrared LEDs that automatically switch on in case of insufficient light conditions.

Choose from eight integrated melodies to activate a lullaby on the transmitter.

The two-way intercom allows you to talk and soothe your baby. You can check the temperature in your baby's room at any time thanks to the built-in transmitter thermometer.

The monitor has a portable battery, so you can always keep it on hand. Before using this product, carefully read the precautions for use and charge completely the monitor battery.

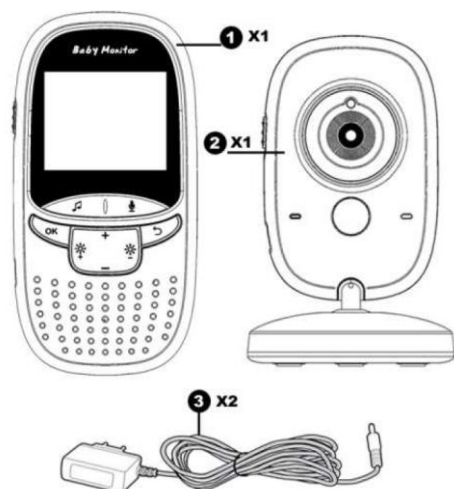

PRECAUTIONS FOR USE

This baby monitor satisfies all needs and complies with the rules related to this type of product. When used according to the instructions described in this manual, the product is safe.

Read carefully this manual with special attention to the following points:

- The installation must be made by an adult.
- This product is not a toy. Do not allow children play with it.
- This baby monitor does not replace adult supervision.
- Do not place the camera in the bed or within the reach of children. Leave at least 1 meter's distance.
- Keep cables out of children's reach.
- Do not use the baby monitor near water or near a source of heat.
- Use exclusively the adapters supplied with the product.
- Do not touch the connectors with sharp or metal objects.
- Do not attempt to open the casings.

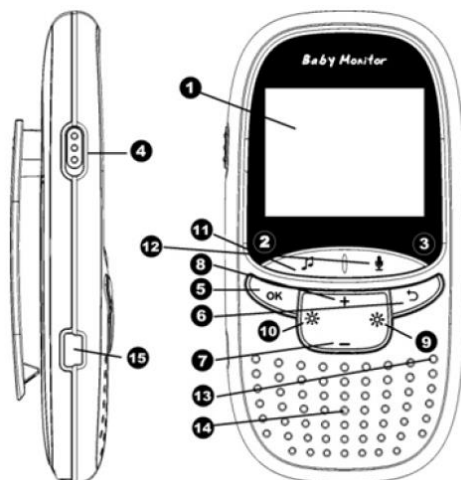

PACKAGE CONTENT

1. Monitor X1

Electric and electronic equipment and included batteries contains materials, components and substances that can be hazardous to your health and the environment, if the waste material (discarded electric and electronic equipment and batteries) is not handled correctly.

Electric and electronic equipment and batteries is marked with the crossed out trash can symbol, seen above. This symbol signifies that electric and electronic equipment and batteries should not be disposed of with other household waste, but should be disposed of separately.

As the end user it is important that you submit your used batteries to the appropriate and designated facility. In this manner you make sure that the batteries are recycled in accordance with legislature and will not harm the environment.

All cities have established collection points, where electric and electronic equipment and batteries can either be submitted free of charge at recycling stations and other collection sites, or be collected from the households. Additional information is available at the technical department of your city.

Hereby, Inter Sales A/S declares that the radio equipment type VB602 is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address: www.denver-electronics.com and then click the search ICON on topline of website. Write model number: VB602. Now enter product page, and red directive is found under downloads/other downloads.
