

Important information about the adaptor for 6,5" – 8" and 8,5"

If you have one of below adaptors, please be aware on below:

This model has an adapter with cut-off functionality (adapter will power off shortly after battery is full), as extra safety to prevent overcharging.

The cut-off function has the effect, that there is a difference in the voltages of the adaptor and the electric scooter, and this can give a little spark when you connect it.

This is not dangerous! And it is perfectly normal
