User Manual

Carabiner

## **Specifications**

\* Battery capacity: 10000 mAh

\* Charging Input by Solar: 5V/0.24A (1.2W)

\* Type-C Input: 5V/2A

\* USB Output1: 5V/2A

\* USB Output2: 5V/2A

### **CHARGING THE POWERBANK**

Three charging methods: Solar, hand-cranking, electricity.

Dual USB output: You can charge two devices simultaneously.

Three levels brightness LED torch with SOS mode, it will be extremely useful when facing a disaster and for travelling.

With remaining power LED indicators, you can know clearly about the power bank's remaining battery power.

### **CHARGING YOUR DEVICE USING THE POWER BANK**

#### **USING THE POWER BANK**

Plug the cable into the USB port on the powerbank, the other end goes into your device. Battery LED indicator will turn blue and your device will show it is charging. Battery capacity display: press the ON/OFF button (8), there are 4 LEDs displaying the battery capacity. If there is only one or two LEDs lit, it needs to be charged. After you have charged your device, recharge the power bank before using again.

#### **LED Light**

Press and hold the button (8) for three seconds to switch the light on or off.

Short press to switch light mode.

#### **Hand crank charging**

It is also designed for emergency situations (no power, no sunlight).

Please don't use it when not in these emergency situations.

In addition, please hand-crank the handle with uniform speed.

Please notice - All products are subject to change without any notice. We take reservations for errors and omissions in the manual.

Electric and electronic equipment and included batteries contains materials, components and substances that can be hazardous to your health and the environment, if the waste material (discarded electric and electronic equipment and batteries) is not handled correctly.

Electric and electronic equipment and batteries is marked with the crossed out trash can symbol, seen above. This symbol signifies that electric and electronic equipment and batteries should not be disposed of with other household waste, but should be disposed of separately.

As the end user it is important that you submit your used batteries to the appropriate and designated facility. In this manner you make sure that the batteries are recycled in accordance with legislature and will not harm the environment.

All cities have established collection points, where electric and electronic equipment and batteries can either be submitted free of charge at recycling stations and other collection sites, or be collected from the households. Additional information is available at the technical department of your city.
